

Northeast Mast Climbers

The largest factory-authorized U.S. dealer of HEK work & material transport platform rentals & sales

Northeast Mast Climbers (NEMC) is the largest factory-authorized fleet dealer of HEK work and material transport platform rentals and sales in the United States. We offer the complete line of HEK mast climbing work and material transport machines for construction and other industries needing dependable, proficient vertical access machines and parts.

NEMC was started by Victor Marcantoni while he was still employed by AlimakHek, Inc., the largest manufacturer of mast climber work platforms in the world. With the permission of his superiors, Marcantoni began purchasing units in 2004. In 2006, he purchased the AlimakHek dealership for the Tri-State area (PA, NJ and DE) from Norris Sales Company, whom he sold the units to back in 2002. With that purchase and team, NEMC became the premier company that rents and sells mast climbers.

The company brought three former employees from Hek Platforms and Hoists, and three employees from the largest masonry contractor, to purchase Hek machines as part of their operation. With the experienced crew, NEMC has provided equipment on some of the highest profile and most difficult projects on the East Coast.

OUR EQUIPMENT:

With the equipment provided by Northeast Mast Climbers, your jobs will be carried out efficiently and economically. All machines are modular and easy to assemble, offer plenty of room to perform work, and provide rapid and energy-saving transportation of personnel and material. Units are available for any job that requires as few as one unit or as many as 20.

Alimak APF — The highest travel speed for a work platform at 39 ft per minute and with the longest configuration for a single at 64' long and twin at 142' long. Stands 72' outside or 105' inside on a mobile chassis. Especially ideal for façade, towers, and structures with payload capacities up to 17,680 lbs.

HEK MSM Super — A highly-flexible work platform ideal for elevations up to 200 m and can be used with single or double masts. Platform lengths extend from 1.5 m to 32.6 m with payloads up to 4,000 kg.

HEK MSM 5000 — A freestanding work platform ideal for masonry, brick laying, cladding, glazing, renovation or demolition with its lower deck. Platform dimensions are 1.5 m wide to 15 m long with a payload capacity of 5,500 kg.

HEK MSHF — A freestanding work platform ideal for when anchoring is not an option. Rises 20 m outside or 30 m inside on a mobile chassis. Especially ideal for façade, towers, and structures with payload capacities up to 4,000 kg.

HEK ProMax — A work platform with a gearbox providing a 57% increase in travel speed to 11 m (36 ft) per minute. Load capacity in single-mast configuration is 3,000 kg maximum and 5,000 kg in twin-mast configuration.

HEK GTP Dual 500 — A single mast machine ideal for when space is limited. Maximum payload is 500 kg (including three people) up to heights of 120 m. Platform dimensions are 1.25 m x 1.6 m.

HEK GTP Dual 1500 — A twin mast machine with a large-sized platform. Maximum payload is 1,500 kg (including seven people) up to heights of 120 m. Platform dimensions are 4 m x 1.5 m.

OUR SERVICES:

NEMC is staffed with certified HEK technicians and additionally offers the following support services to ensure first-rate customer satisfaction:

- Rentals
- Sales
- Parts
- Delivery
- Installation
- Erection
- Dismantling
- Operational and Safety Training
- Engineering

After a fire destroyed the south side of the **Borgata Hotel & Casino** (above), NEMC provided a solution of a dual twin on one set of mast to expedite the completion, allowing two contractors to work on demolition of the damaged panels/curtain wall at once.

Equipment was used to install a curtain wall system to re clad the entire building of **1140 Avenue of the America's** (above). This project had multiple contractors working on the mast climbers. The location of this project, one block from Time Square, made it a challenge with the amount of pedestrians and vehicle traffic on the street.

The Wexford Science Center (above) required the use of nine units to perform the installation of curtain wall systems. This is a typical project in size and scope for NEMC. Engineered drawings were required for each unit and a layout for where the units were to be positioned on the building.

OUR CUSTOMERS:

NEMC has ongoing and successfully completed industrial and commercial construction projects throughout the Northeast for an impressive list of customers — many of whom return to us regularly to meet their construction needs. The following is a partial list of our customers:

- Almond Glass Works
- APG International, Inc.
- Capital Construction (Diamond Concrete)
- Caretti Restoration & Eastern Exterior Wall Systems, Inc.
- Clemens Construction Company
- Glazing Concepts, LLC
- Enterprise Architectural Sales, Inc.
- Jersey Panel Corporation
- JTB Masonry, Inc.
- Mason Building Group
- Masonry Preservation Services
- National Glass and Metal, Inc.
- Network Construction
- Pyramid Construction & Engineering
- R.A. Kennedy & Sons, Inc.
- Ridgeview Glass, Inc.
- Safeway Environmental
- Structural Preservation Systems, LLC
- Watertrol, Inc.
- Wyatt, Inc.

OUR PROJECTS:

The Water Club at the Borgata Hotel and Casino, Gaylord National Hotel on the Potomac River, Berwick Nuclear Power Plant, and 1140 Avenue of the Americas in New York City are just a small sample of the high profile projects that have been completed by NEMC. These projects involved a high degree of engineering, technical expertise and mast climber innovation that had never been attempted let alone completed, safely and on time. The following is a partial list of our projects:

- 305 PALISADES CONDOMINIUMS, Cliffside Park, NJ
- 602-617 NORTH AMERICAN STREET, Philadelphia, PA
- 1140 AVENUE OF THE AMERICA'S, New York, NY
- BERWICK NUCLEAR POWER PLANT, Berwick, PA
- BORGATA HOTEL & CASINO, Atlantic City, NJ
- BUTZ COMPANY, Allentown, PA
- CAESAR TEMPLE TOWER RENOVATION, Atlantic City, NJ
- CHRISTINA LANDING CONDO TOWER II, Wilmington, DE
- CON EDISON STACK DEMOLITION, Brooklyn, NY
- CU257, Philadelphia, PA
- ESSEX COUNTY COURTHOUSE, Newark, NJ
- GAYLORD NATIONAL HOTEL, Oxon Hill, MD
- THE GRAND AT DIAMOND BEACH, Wildwood, NJ
- HAYES HOUSE CONDOMINIUMS, Stamford, CT
- LEEDS SCHOOL, Philadelphia, PA
- LEHIGH COUNTY COURTHOUSE, Allentown, PA
- LEWISBURG FEDERAL PRISON, Lewisburg, PA
- LORD & TAYLOR, New York, NY
- NEW GIANTS STADIUM, East Rutherford, NJ
- ONE BRYANT PARK, Times Square, NY
- PAOLI HOSPITAL, Paoli, PA
- ROBERT WOOD JOHNSON HOSPITAL, Hamilton, NJ
- TEMPLE UNIVERSITY HOSPITAL, Philadelphia, PA
- WEXFORD SCIENCE CENTER, Philadelphia, PA
- WPVI STUDIOS, Philadelphia, PA
- XANADU, East Rutherford, NJ

CONTACT US:

The NEMC's yard is conveniently located off the Pennsylvania Turnpike near Philadelphia and serve New York, New Jersey, Pennsylvania, Delaware, Maryland, Washington DC, and Virginia. For more information, contact us at 877-HEK-MACHINE or visit www.NortheastMastClimbers.com.
